

APPLIED BEHAVIOR ANALYSIS SERVICES

Serving Children, Youth, and Families

IN THEIR COMMUNITIES

Our **Applied Behavior Analysis (ABA)** services are based on the science of learning and behavior and involve the process of implementing basic behavioral interventions to create meaningful behavior changes. ABA services are typically provided to children, youth, or young adults diagnosed on the Autism Spectrum and include assessments and 1:1 interventions to help them improve their behavioral, social, communication, and adaptive skills.

ABA uses these interventions to increase desired or socially appropriate behaviors and decrease behaviors that create barriers for or cause harm to themselves or others.

Data is recorded while the behavioral interventions are implemented, to determine the effectiveness of the interventions and make ongoing treatment decisions.

SERVICES INCLUDE:

- A Behavior Consultant and/or an Assistant Behavior Consultant provides an assessment of the child's strengths and skill deficits based upon observation and data collection. They design interventions to support a child, youth, or young adult to increase skills and decrease undesirable behaviors.
- Behavioral Health Technicians implement the 1:1 interventions designed by the Behavior Consultant in the child, youth, or young adult's natural settings.
